

ABSTRACT OF THE DISCLOSURE

A touch panel includes: a first layer and a second layer that are arranged to face each other, with a predetermined gap being formed between the first  
5 layer and the second layer; a first resistance film that is formed on a surface of the first layer, the surface facing the second layer; a second resistance film that is formed on a surface of the second layer, the surface facing the first layer; and a power supply  
10 unit that is provided on the first resistance film. In this touch panel, the first resistance film and the second resistance film form an antenna.
